## **New! Podiatric Medicine and Surgery Library™ on CD-ROM**

Once again by popular demand, FARC has expanded its mission of testing psychometrics to include educational content. Now, you can augment your Keystone interactive Q&A simulators, with deep subject matter information. Use each simulator alone; or try our exciting new tool; the *Podiatric Medicine and Surgery Library™*. Better yet! Invest in both for a comprehensive test preparation package of home study material. We suggest combined use in the following manner:

1. Test your knowledge to identify deficiencies with our traditional exam simulation software.
2. Study weak subject areas with the *Podiatric Medicine and Surgery Library™*
3. Retest and restudy; as needed. Monitor your progress and growing confidence.
4. Take and pass the podiatric board examination of your choice.

**NOT a textbook with the same old photographs and boring x-rays. ALL content! NO Filler!**

The *Podiatric Medicine and Surgery Library™* is an exhaustive tool that provides updated information from your medical school clinical years; including internship, residency and fellowship training. There is no need to be away from the office, pay for seminars, buy expensive books, incur exorbitant hotel fees, or pay for meals and travel. *Study anytime! Study anywhere; at your convenience!* This is not a videotape or subscription service with “time-bomb”. When you purchase from us - you own your testing and educational products forever. Our exam simulators and the *Podiatric Library* are simply the most cost-effective and efficient way to study and learn.

[Medical Education ... on your laptop, home or office desktop computer!](#)

## **Product Information**

**DEEP EDUCATION ... All content ... No filler!**

The *Podiatric Medicine and Surgery Library* includes the following content. All FARC products are subject to weighted updates and revisions without notice. CD-ROM Library requires free Adobe Reader© software; not included. All medical-surgical topics included in a single library tool.

- *And so much more!*

For your protection from *faux* products, our material is: (1) continually updated, (2) non-advertiser driven and (3) securely purchased - rather than delivered thru costly online subscriptions. To date, FARC board simulation software has been used by over 6,000 podiatrists. We have the most popular programs for all written and oral podiatric board examinations on the market.

And, you have our product replacement “*guarantee to pass*”.

Please call, fax or email for more information; or visit us on the Web: [[www.PodiatryPrep.com](http://www.PodiatryPrep.com)].
